

MOBEEN SHEIKH

Full Stack Developer

As a software engineer with over two years of experience, I work on Frontend development, utilizing HTML, CSS, ReactJS, and AngularJS to create dynamic and user-friendly interfaces. While in the Backend , I specialize in Node.js and Python Django, employing both microservices and monolith architecture. My focus lies in crafting robust APIs and seamlessly integrating them with the frontend. I excel in managing databases, proficiently handling both SQL and NoSQL databases to ensure efficient data storage and retrieval. For deployment using Linux server, AWS Lambda, docker, kubernetes, herku and netlify. I am dedicated to creating a cohesive and high-performance backend system that seamlessly connects with the frontend.

Experience

- **Full Stack Developer**
Haqana Commercial Brokers Est. Dubai, UAE
Oct 2023 - Jan 2024
 - Full Stack Developer with expertise in Node.js and microservices architecture.
 - Proficient in deploying applications on AWS Lambda
 - Developing dynamic and responsive frontends using React.js
- **Full Stack Developer | Mern Stack Developer**
Troon Technologies
July 2022 - Aug 2023
 - Working as a MERN developer at position with technologies Node js , React js , Express JS and Web3.0. FLOW and NEAR blockchain integrate in application to get data and send transaction to the blockchain. Use Redux saga, Redux thunk and context api's for state management in applications.
 - Use Node mailer and twilio for sending mail and SMS. Use Pinata, Cloudinary cloud storage in application. Use Multer for local storage in application.
 - Use JWT and Passport(JWT) authentication. Use Cookies session for store session of user in application. Use Postman for test Api's. Create and Use swagger for test Api's.
 - Use Node mailer and twilio for sending mail and SMS. Use Pinata, Cloudinary cloud storage in application. Use Multer for local storage in application
- **Full Stack Developer**
NCRI, 6285 Northam Dr, Mississauga, ON L4V 1X5, Canada
May 2021 - June 2023
 - As a Full Stack Developer. My expertise included AngularJS for the frontend and Python Django, along with Django Rest Framework, for the backend and MYSQL for the database management.
 - Implemented secure user authentication using JWT and Passport (JWT).
 - Utilizing FTP and SFTP for cloud file management, and imposing Amazon S3 bucket for efficient storage.
 - Deployment on Heroku server as well as Linux Server
