DEAR HIRING MANAGER,

I am writing to express my interest in the Full Stack Developer position. With over 2 years of experience working in multinational companies, I am excited about the prospect of bringing my skills and expertise to your dynamic team.

In my previous roles, I have honed my skills in both Frontend and Backend development, creating dynamic and user-friendly interfaces using HTML, CSS, ReactJS, and AngularJS. On the Backend, I specialize in Node.js and Python Django, adeptly employing both microservices and monolith architecture to build robust systems. My primary focus is on crafting resilient APIs and seamlessly integrating them with the frontend, ensuring a smooth and efficient user experience.

My proficiency extends to database management, where I am adept at handling both SQL and NoSQL databases to ensure efficient data storage and retrieval. Additionally, my experience includes deployment using Linux server, AWS Lambda, Docker, Kubernetes, Heroku, and Netlify. I am well-versed in leveraging these technologies to ensure the seamless delivery and scalability of applications.

I shall be very thankful if you consider my application. I look forward to the opportunity to discuss how my skills and experience make me a strong fit for the Full Stack Developer position. Please find my resume attached for your reference.

Sincerely,

Mobeen Sheikh
